ALL THINGS METAL
A TRADING NAME OF
ROKIM KENYA LIMITED

Premium Steel Structures & Architectural Ironwork

Strong Structures. Modern Designs. Lasting Security.

- SECURITY WINDOWS & DOORS**
Strong. Stylish. Secure.
- STEEL & METAL FABRICATION**
Custom designs.
- CANOPIES & AWNINGS**
Weather protection.
- BALCONIES & RAILINGS**
Elegance & safety.
- WELDING SERVICES**
Precision & durability.

Quality Work at Fair Prices

ALL THINGS METAL is an industrial service provider specializing in turning raw steel into pre-engineered structural components, assemblies, and custom end-products. Acting as a critical link between architectural design and physical construction, these firms blend heavy engineering, advanced machinery, and skilled craftsmanship to serve sectors like **commercial construction, infrastructure, energy, and manufacturing trading under Rokim Kenya LLC.**

Our Core Capabilities & Services

A standard steel fabrication firm offers a full-scale pipeline from raw materials to final job-site installation:

- **Engineering & Detailing:** Transforming architectural blueprints into high-precision 3D shop drawings using software like Tekla or AutoCAD.
- **Primary Processing:** Cutting, burning, and profiling raw plates and beams using CNC plasma cutters, lasers, and saws.
- **Forming & Machining:** Bending, rolling, punching, and milling steel sections into specific geometric profiles.
- **Welding & Assembly:** Uniting components using heavy-duty industrial welding (such as MIG, TIG, and Stick) carried out by certified/coded welders.
- **Surface Treatment:** Protecting steel from corrosion through processes like abrasive sandblasting, industrial painting, or **Hot-Dip Galvanizing**.
- **Site Erection:** Shipping completed components to the site and assembling the structural frameworks using mobile cranes and rigging teams.

Product Portfolio

We manufacture structural systems and miscellaneous metal assemblies:

- **Heavy Structural Work:** I-beams, H-beams, open-web joists, trusses, columns, and building frames.
- **Industrial Equipment:** Storage tanks, pressure vessels, silos, and piping networks.
- **Access Solutions:** Structural staircases, walkways, handrails, platforms, and safety cages.
- **Custom Fabrication:** Machine guards, specialized brackets, skids, and infrastructure components.
- **All Things Metal**

Quality Assurance & Compliance

To operate legitimately, standard firms adhere strictly to strict international and local structural steel guidelines:

- **Welding Standards:** Adherence to benchmarks AWS (American Welding Society) or ISO 3834.
- **Structural Steel Codes:** Component execution to standards AISC (American Institute of Steel Construction) or EN 1090 (CE Marking for Europe).
- **Safety Protocols:** Maintaining robust Health, Safety, and Environment (HSE) management systems to prevent workshop and field hazards

Transform your property with engineering that marries unbreakable security with modern elegance.
From

industrial-grade structural framing to bespoke residential finishes, we deliver precision-crafted steel solutions tailored to your exact specifications.

Why Property Owners Choose Us

- **Maximum Durability**

Treated with anti-rust, weather-resistant primers and premium powder coatings.

- **Tailored Fabrication**

We build exactly to your architectural blueprints or custom design ideas.

- **Certified Welding**

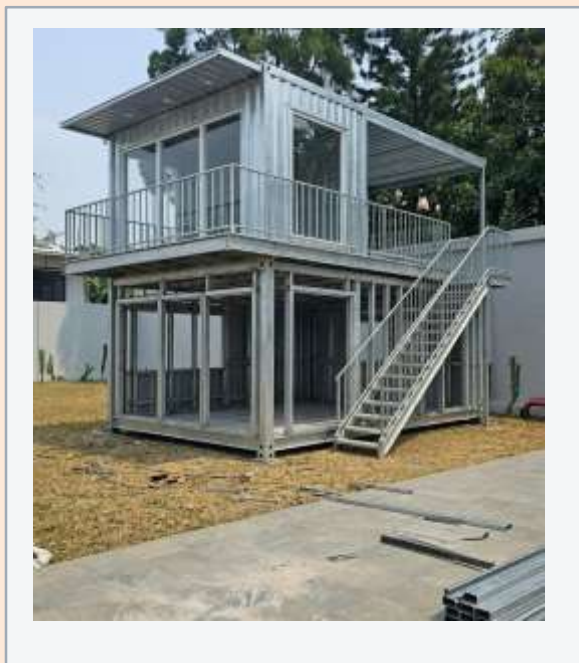

Every joint is precision-welded for structural integrity and clean aesthetics.

- **Turnkey Service**

We handle everything from site measurement and fabrication to final installation.

Structural Steel Work

Engineered frameworks, warehouses, and heavy-duty supports.

Security Gates & Fences

Heavy-gauge, tamper-resistant entry systems built for ultimate protection.

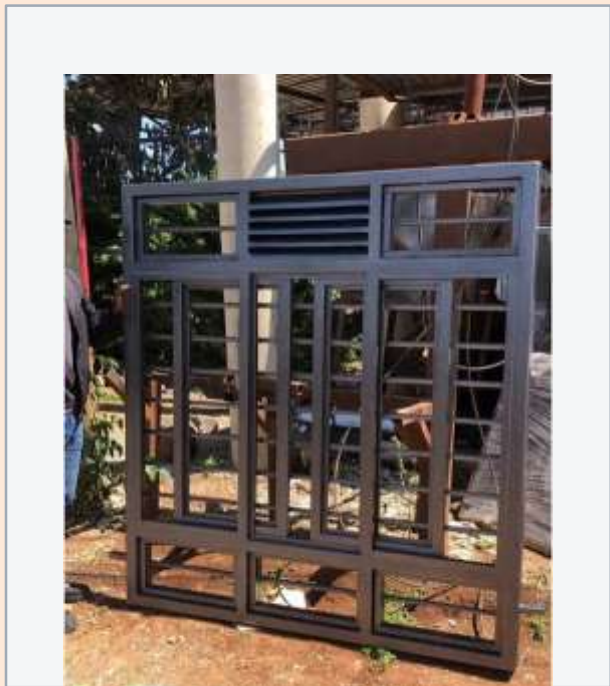

High-Security Windows & Doors

Sleek, modern metal frames with reinforced locking mechanisms.

Custom Canopies & Awnings

Weatherproof overhead shelters designed for homes and commercial fronts.

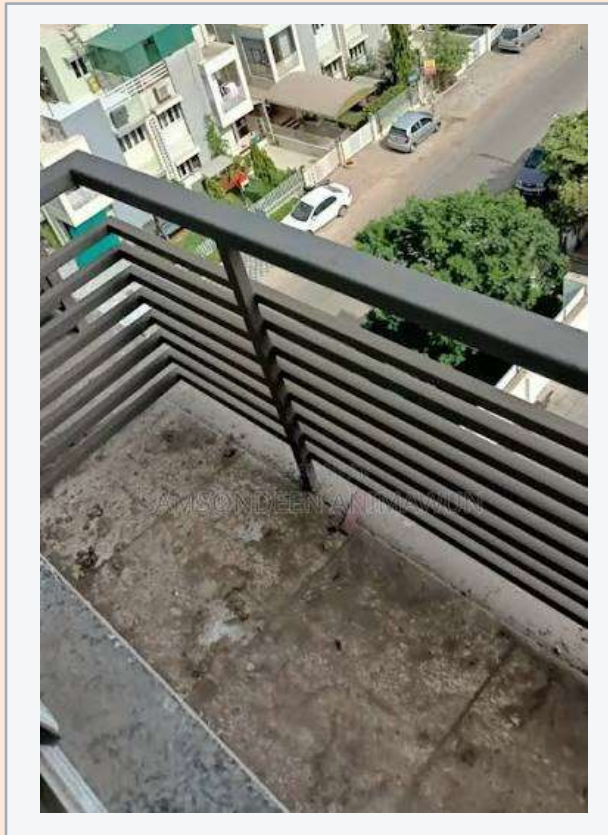

Architectural Balconies & Railings

Code-compliant, elegantly welded guardrails and balconies.
