Corporate & Philanthropic Impact Catalogue

Executive Summary

Ecostoves Limited is a premier, limited liability renewable energy company registered in Kenya and operating as a subsidiary of Rokim Kenya Limited. Established a decade ago, the company is dedicated to vulnerability reduction by breaking the cycle of energy poverty and actively responding to climate change impacts. Ecostoves Limited achieves this by designing, manufacturing, and distributing high-efficiency, market-based **Clean Cooking Solutions (CCS)** tailored to the unique requirements of diverse customer segments across East Africa.

Adopt a Cookstove Initiative: We invite corporate partners, philanthropic organizations, and individual champions to Adopt a Cookstove and deliver life-changing, energy-efficient cooking solutions to Nairobi's most vulnerable residents living in over 20 informal settlements. Your donation breaks the cycle of energy poverty, giving a household an eco-friendly stove that cuts fuel needs by 60%, bringing everyday cooking costs permanently within their survival budget.

Dear

ROKIM CLEAN COOKSTOVES DISTRIBUTION PROGRAMME

The Ministry of Energy has prioritized the provision of clean cooking solutions to Kenyans to improve their wellbeing, and environmental sustainability. To that end, the Ministry has an ambitious target of transitioning all Kenyans to using modern clean cooking solutions by 2028.

To achieve this target, the Ministry is collaborating with both public and private sector players. In this respect, the Ministry of Energy has received a request for partnership from Rokim Kenya Limited. They intend to launch a National Clean Cook Stoves programme dubbed as "National Climate Change Action: Rokim Clean Cookstoves Distribution Program". The aim of the programme is to raise awareness across the country on the need of transition from traditional and harmful cooking methods to cleaner cooking options. Implementation of this activity is in line with the Ministry of Energy policy.

The purpose of this letter is to request you to extend any necessary support to Rokim Kenya Limited as they undertake this task in different counties.

RE: Clean Cookstove Solutions (CCS) Distribution; Specific Partnership proposal

Your letter dated 26th July, 2022, on the above subject matter refers. The Ministry of Environment and Forestry appreciates the actions being undertaken by your organization in promoting the transition towards clean cooking in Kenya.

As the world implements the Sustainable Development Goals (SDGs) and addresses climate change, it is particularly important that we invest in proven, scalable solutions like clean cooking that bring cross-cutting and economically inclusive impacts. Clean cooking directly delivers across 10 of the SDGs, including Goal 13 on climate action. Clean cooking will play a key role in delivering on the Paris Climate Agreement. Kenya has prioritized household energy in its Nationally Determined Contributions (NDC) to reduce greenhouse gas emissions and adapt to the impacts of climate change.

As a ministry responsible for implementation of Kenya's NDCs, we undertake to partner with your organization in raising awareness on this transition as a means of achieving the country's NDC targets of reducing greenhouse gas emissions by 32% relative to business-as-usual scenario of 143MT of carbon dioxide equivalent.

We look forward to continuing this partnership with your organization and always remain available to offer any required technical support necessary for achieving this initiative.

Augustine K. Kenduwa,

RE: GO TO MARKET CONCEPT & THE ROLE OF NGAO

Reference is made to the letter dated 20th January, 2022 from Rokim Kenya Limited (0719281900) on the above subject.

Rokim Limited has requested to partner with NGAO to distribute clean stoves across the country. The company has already carried out baseline survey in all counties on cooking data, purchasing ability, economic parity and knows what type of cooking stoves and fuel are needed for deployment, percentage of households which might require subsidy and installment plan.

At the Sub County level, Rokim will initiate mobilization of resources and inventory; identify and engage local merchants as Sub County distributors; train NGAOs on clean cook stove benefits and avail marketing material and sample cook stoves. The major role for NGAO in this exercise will be to enhance the partnership, awareness creation and dissemination of clean cooking benefits. Given the differing needs per County, Rokim will provide a comprehensive approach to the respective DCCs on the partnership.

This is to inform you of the above exercise and request you to support the initiative.

Our Ref: COG/47 Vol. 7 (51)

3rd November 2022

To: All Excellency Governors

Your Excellency,

ROKIM CLEAN COOKSTOVES DISTRIBUTION PROGRAMME

The above subject.

The Council of Governors acknowledges the need to adopt clean cooking solutions to alleviate the misery in all the counties from energy poverty. Over 70% percent of Kenyans still rely on traditional biomass for cooking, with significant implications on public health as well as on the environment due to deforestation and greenhouse gas emissions. Adopting clean cooking technologies has been identified as a potential solution to mitigate these effects.

Currently, several stakeholders from the private sector have partnered with the county governments to distribute clean cooking technologies. Rokim Kenya Limited is one of the stakeholders that has shown commitment to support clean cooking initiatives. They have recently launched "National Clean Cook Distribution Program" with an objective of distributing improved cook stoves in different Counties.

The purpose of this letter is to request you to extend any necessary support to Rokim Kenya Limited as they undertake their National Clean Cooking Distribution program in various Counties.

Yours sincerely,

Mary Mwili
Chief Executive Officer
